

Policy for Permanent Transfer of Water

1. All permanent transfer of water service will be Board approved.
2. Water service must be for land within the Tualatin Valley Irrigation District boundaries.
3. All lands must be classified as irrigable.
4. Capacity must be available at the new diversion point.
5. Transfers must have the approval of all interest holders of record.
6. Transfer of water service will also transfer the long-term debt owed to the United States of America and will be recorded as a lien against the property.
7. Transferor will be responsible for all costs of the transfer including but not limited to recording of the lien and associated mapping.
